

Everything in an **HTML** file goes between opening and closing `<html>` tags.

```
<html>  
  <!-- content -->  
</html>
```

An **HTML** file typically
contains a `<head>` & `<body>`.

```
<html>  
  <head>  
  
  </head>  
  <body>  
  
  </body>  
</html>
```
