# Let's blend in some **CSS** herbs & spices:

The screenshot shows a web editor interface on glitch.com. The browser address bar displays 'glitch.com'. The editor is for a project named 'bony-wind-glade' and is editing 'style.css'. The CSS code in the editor is:

```
1 img {  
2   height: 200px;  
3 }
```

The left sidebar shows a file explorer with 'assets', 'README.md', 'index.html', and 'style.css' (selected). The right sidebar shows a preview of a cartoon dinosaur holding a book labeled 'DOCS'. Below the preview, the text reads:

## Prophet Orpheus
